

FLEXIPOINTS & RIGID POINTS

FLEXIPOINTS 15-25MM & RIGID POINTS 15MM

Galvanised steel	Dry adhesive	Produced in rigid strips	Easy to handle
-------------------------	---------------------	---------------------------------	-----------------------

Type of material
Flexi and rigid points can be used on wood, MDF and plastic mouldings

Designed for

Bespoke Framer	Retail Framer	Medium Contract Framer	Volume
-------------------	------------------	------------------------------	--------

Flexipoints 15mm

15mm
5/8"

Unique galvanised steel
A Cassese world exclusivity, to protect flexipoints against rust

Easy bending
Thanks to a unique and patented steel alloy that can be bent many times without breaking

Produced in rigid strips
Easy to handle and load into guns. Prevent them from breaking inside their box

Special dry adhesive
Designed not to leave residue into the shooting head, to prevent from gun jamming

Compatible with almost all flexiguns
Its universal design (originally invented by Cassese) makes it fit most brands of flexiguns (excl. Fletcher)

*Available in 2 colours :
- Black (15,000 pcs/box or 80,000pcs/box)
- Silver (80,000 pcs/box only)

Arrow flexipoints 15mm

15mm
5/8"

Fits all brands of flexiguns
Thanks to its new design "Arrow" shape, it can be loaded in all brands of flexiguns of the market (manual or pneumatic), including Fletcher

Unique Galvanised steel
A Cassese world exclusivity, to protect flexipoints against rust

Easy bending
Thanks to a unique and patented steel alloy that can be bent many times without breaking

Produced in rigid strips
Easy to handle and load into guns. Prevent them from breaking inside their box

Special dry adhesive
Designed not to leave residue into the shooting head, to prevent from gun jamming

*Available only in black colour
(3,400 pcs/box)

Rigid points 15mm

15mm
5/8"

No need to buy a new gun
Thanks to its thickness of 0.40mm (same as a regular flexipoint), the Cassese rigid point can fit most brands of manual or pneumatic flexiguns

A unique metal providing a perfect hardness with only 0.40mm thickness.
Ideal when there is no need to re-open the back of the frames (for definitive fixing)

Unique Galvanised steel
A Cassese world exclusivity, to protect flexipoints against rust

Produced in rigid strips
Easy to handle and load into guns. Prevent them from breaking inside their box

Special dry adhesive
Designed not to leave residue into the shooting head, to prevent from gun jamming

*Available only in silver colour
(10,000 pcs/box)

Flexipoints 25mm

25mm
1"

Economical
Thanks to its larger size and higher resistance, 1 single 25mm flexipoint can easily replace minimum 4 pieces of 15mm flexipoints

25mm 1" vs 15mm 5/8"
Wider, larger and thicker than regular 15mm flexipoints... but still flexible!

Give safer and maximum resistance and support to heavy and big frames, mirrors and poster frames

For removable back or definitive fixing
25mm flexipoints can be used either :
- for photo frames (removable back)
- for picture frames (definitive fixing)

Unique Galvanised steel
A Cassese world exclusivity, to protect flexipoints against rust

Special dry adhesive
Designed not to leave residue into the shooting head, to prevent from gun jamming

*Available in 2 colours : black and silver
(3,000 pcs/box)
