THE SMARTSTOP™ FROM CASSESE

is digital automatic measuring stop specially designed for CS 969 or CS 999. It is designed for high volume contract or chop-service framers, who want to maximize productivity and minimize operator mistakes.

This extension is available with two different measuring capacities: 2m or 3m for and 80inch or 120inch.

Its touch screen allows you to quickly set the desired frame sizes. The operator can also memorize the dimensions of up to 60 different frames' sizes.

The SmartStop™ can operate in 9 different languages English, Spanish, French, German, Dutch, Italian, Japanese, Chinese and Russian.

DIMENSIONS CS969 (with 2m SmartStop)

Length	4,663 mm
Width	1,010 mm
Height	1,310 mm

DIMENSIONS CS999 (with 2m SmartStop)

Length	4,690 mm
Width	900 mm
Height	1,510 mm

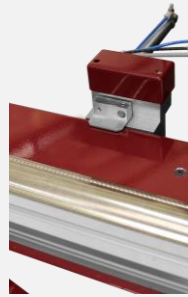

MEASURING CAPACITY (OUTSIDE DIMENSIONS)

Minimum: 100mm (4")
Maximum: 2,040mm (80") for 2m/80" version
Maximum: 3,040mm (120") for 3m/120" version

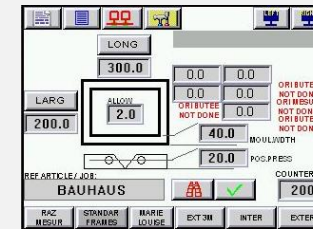

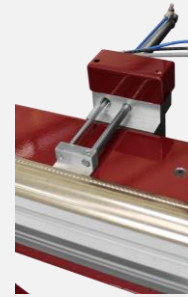

CUTTING FEATURES

Large measuring capacity
The Smartstop™ extension has a measuring capacity of 2 meters (80"). It is designed for high volume contract or chop-service framers, who want to maximize productivity and minimize operator mistakes

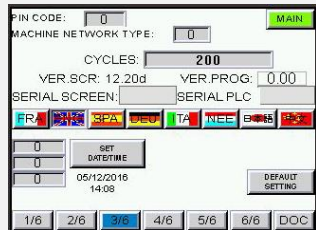

Automatic width measurer
This instantly measures the rebate width of the moulding about to be cut, so that the cutting stop can adjust itself automatically to the correct dimension required. It avoids any mistakes of measurement and is much quicker than manual adjustment.

Flexible
The operator can change between short and long size accurately, at any time, just by touching a button.

SAFETY FEATURES

Odometer / chop counter
Shows the quantity of cuts made, and can be reset for use as a chop counter for big batches.

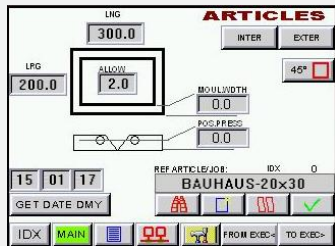

Minimize operator mistakes
Because of its memory and clear information readout on the touchscreen, operator error is reduced to nil, saving waste, time and money.

Multi-Lingual
The SmartStop™ can operate in 9 different languages English, Spanish, French, German, Dutch, Italian, Japanese, Chinese and Russian.

MEMORY FEATURES

Memorize your frame's sizes
The SmartStop™ can memorize the dimensions of up to 60 different frames' sizes. You can set this up for all your standard frame sizes.

AEGEAN	-10
