

CASSESE FRAMER'S POINTS

RIGID POINTS FOR FRAMEMASTER GUNS

Can be used with :

FrameMaster Point Driver

Pneumatic FrameMaster

Box of 3,000 pcs

1 Outer carton =
10 × Boxes of 3,000 pcs

Premium quality steel

Utilizing our 40 years of engineering experience, we have developed a unique manufacturing process which makes Cassese Framer's Points extremely rigid, and ideal for any permanent fitting of the heaviest materials.

Zinc-plated to eliminate corrosion

Cassese Framer's Points are specially coated with a premium quality zinc plating making them corrosion-free.

Unique double sided adhesive

Cassese Framer's Points are bonded on both sides with a unique dry adhesive :

- Dry adhesive = eliminates gun jamming & extends tool life
- Bonded on both sides = less strip breaks & reduced waste
- Rigid strips = easier handling & faster loading

Convenient packaging

Cassese Framer's Points come in boxes of 3,000 units and are packed in compact, convenient boxes featuring a glossy, cello glazed, moisture repellant finish.

Did you know ?

In 1986, Antoine Cassese received in the USA the Award of Recognition from the PPFA (Professional Picture Framers Association) for his invention of the underpinner (v-nailer), the wedge (v-nail) and the flexible point, which have significantly contributed to the advancement of the Picture Framing Industry.
